

THE INSPECTOR'S HANDBOOK SERIES

**PRACTICAL KNOWLEDGE.
REAL-WORLD APPLICATION.
INSPECTION DONE RIGHT.**

This handbook provides piping inspectors with the essential knowledge and field-proven practices needed to ensure piping systems are fabricated, inspected, tested, and documented in accordance with applicable codes, standards, and client requirements.

From material verification and isometric interpretation to welding, non-destructive examination, pressure testing, and final system turnover, this guide delivers practical, real-world inspection guidance for both shop and field environments.

- ✓ Piping Codes and Standards (ASME B31.1, B31.3, API 570)
- ✓ Pipe, Fittings, Flanges, and Valves
- ✓ Material Receiving and Traceability
- ✓ Isometric Drawings and Weld Mapping
- ✓ Fit-Up and Welding Inspection
- ✓ Branch Connections and Reinforcement
- ✓ Supports, Hangers, and System Restraints
- ✓ Non-Destructive Examination (NDE)
- ✓ Pressure Testing and System Integrity
- ✓ Documentation and Turnover Packages
- ✓ Final Walkdowns and Punchlists

BUILT FOR INSPECTORS.
FOCUSED ON QUALITY.
COMMITTED TO INTEGRITY.
