

THE INSPECTOR'S HANDBOOK SERIES

PRACTICAL KNOWLEDGE.
REAL-WORLD APPLICATION.
INSPECTION DONE RIGHT.

This handbook provides turnaround inspectors with the essential knowledge and field-proven practices needed to plan, execute, document, and close out safe and successful turnaround, outage, and shutdown activities.

From planning and pre-turnover through construction, maintenance, testing, and final turnover, this guide delivers practical references and real-world direction for every phase of the turnaround lifecycle.

INSIDE THIS EDITION:

- Turnaround Planning and Execution
- Pre-Turnover and Work Package Verification
- Mechanical, Piping, and Structural Inspections
- Welding, NDE, and Pressure Equipment Checks
- Coating, Insulation, and Specialty Inspections
- Commissioning, Testing, and Pre-Start Checks
- Quality Documentation and Record Control
- Safety, Confined Space, and Hot Work Oversight
- Punch List Management and Closeout
- Turnover and Handover Requirements
- Common Deficiencies and Lessons Learned
- Checklists, Forms, and Quick Reference Tables
